

FOR APARTMENT OWNERS & RESIDENTS

Bring JAXIAN to your building.

You do not need to understand strata procedure or prepare a technical case. Use this guide to start a conversation, place JAXIAN on the agenda and invite us to demonstrate what is possible.

01

Share the idea

Send the email below to your strata manager, committee secretary or building manager.

02

Add it to the agenda

Ask for JAXIAN to be discussed at the next committee or owners corporation meeting.

03

Invite JAXIAN

We can attend, demonstrate the platform and prepare a building-specific review.

Ready-to-send email

Subject: Suggestion for our building - JAXIAN

Hello,

I would like the committee to consider investigating JAXIAN for our building.

JAXIAN combines modern apartment intercom, visitor access, parcel management and building communication in one platform. Its intercom can call residents through WhatsApp, allowing them to see and speak with visitors and provide access from anywhere.

Could this please be added to the agenda for the next strata committee or owners corporation meeting?

JAXIAN has offered to provide a demonstration and an initial review of the building's requirements. More information is available at jaxian.com.

Kind regards,
[Your name]
[Apartment number]

Suggested agenda wording

JAXIAN building access and parcel review

That the committee investigate options for modernising the building's intercom, visitor access and parcel management, including the JAXIAN platform, and invite JAXIAN to provide a demonstration and an initial review of the building's requirements.

What happens next?

JAXIAN will speak with the appropriate building representative, understand the current system and the problems residents want solved, and prepare an appropriate next step. We will not contact your strata representative unless you ask us to.

Arrange a complimentary building conversation at jaxian.com or email hello@jaxian.com.
